1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Deschamps et al (cited by applicant) in view of Watanabe.

Deschamps et al teaches everything except a printhead carrier system including a printhead carrier configured for movement along a scan path.

Watanabe teaches a printing machine employing a printhead carrier system including a printhead 4,5 configured for movement along a scan path to print on a sheet.

It would have been obvious to one of ordinary skill in the art to have the printing machine of Deschamps et al employ a printhead carrier system with a printhead carrier configured for movement along a scan path to print on the sheet in view of the teachings of Watanabe.

3. Claims 2 through 4 and 7 through 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 11 through 17 are allowed.
